Pvs In Bloom

Final International Conference PVS in BLOOM

During its 36 months long experience PVS IN BLOOM project has triggered more than 19 MW of installed solar energy on marginal areas in Europe. The final conferences which is to be held in Budapest, 22nd September, will promote project effective realizations and the most important solutions for combining renewable energy sources with a strategic approach to the management of areas characterized by intrinsic, induced or latent marginality (terrains that are no longer able to answer positively to investments or that have exhausted their primary and exclusive function).
